*Sassafras Software has a long tradition as an innovator and market leader in tool development for Software Asset Management (SAM). The pioneering KeyServer® product has evolved over more than 20 years since its initial release into an elegant, award-winning, unified tool set for Hardware and Software Asset Management. K2 is a winner of the CODiE Award for "Best Asset Management Solution".*

*K2-KeyAuditor & KeyServer is designed for today's complex physical, virtual, and cross-platform computing environments where it has become a critical component of license compliance and software cost reduction efforts in some of the largest corporate, educational, and government enterprises worldwide. Sassafras enjoys broad support from software publishers, including many technical partners that rely exclusively on K2-KeyServer technology.*

## K2 v7.0 Web-Training: Understanding and Customizing Reports in K2 7.0

**Online Training Sessions: September 12, 2012:** Sassafras Software will host two online web-training sessions for K2-KeyServer version 7.0 on September 12, 2012. The technical training will be offered twice, taught by Sassafras subject-matter experts. The topic will be "Understanding and Customizing Reports in K2 7.0". Sassafras extends an open invitation to all K2-KeyServer administrators, and others, to attend this 90-minute technical training at either of the two times. To register, or request more information, send email to: [info@sassafras.com](mailto:info@sassafras.com)

### Schedule:

Times displayed in USA Eastern Daylight Time - EDT (plus UTC)

### Wednesday, September 12

11:00am, EDT (15:00 UTC)  
7:30pm, EDT (23:30 UTC)

To register, or request more information, send email to [<info@sassafras.com>](mailto:info@sassafras.com)

### Repeating Agenda for both Workshops

#### Basic Report Window User Interface

- Expand - collapse (one or all)
- Sort by any column
- Flip Views between PRIMARY and secondary data
- Interactive - report to management console view
- Drill-down reports & Additional reports from selected data
- Customize Column views
- Count Details field in all grouped reports

#### Save/Export

- Save as - html, text (tab delimited), ,xml, ksr
- Print to pdf
- KSRViewer
  - View any KeyServer report
  - No connection to KeyServer required
  - Can be used by non-admins

#### Selecting, and Passing Parameters in Reports

- From the Menu Bar (*no selection parameter*)
  - Report includes all records from the data source (the "universe" of K2)
- From the Context Menu (*applies a selection parameter*)
  - Report includes only records selected from the context-click
- Filter Definition restrictions
- Division restrictions
  - Reports above line are related to DIVs
  - Reports below are related to Computers w/ DIV as filter

# K2 KeyAuditor & KeyServer

*Sassafras has been instrumental in driving the development of software licensing standards for two decades. Members of the Sassafras team were among the coauthors of the LS-API specification in the early 1990's. In recent years, a Sassafras volunteer has contributed as a coauthor to the ISO/IEC 19770-2 international standard for software identification and served as the Convener of the development group building the ISO/IEC 19770-3 Software Entitlements SAM Standard.*

*Sassafras Software has been recognized by the world's leading IT Asset Management associations with the highest levels of professional recognition in the IT Asset Management industry.*

## **K2 Supported Platforms:**

*Windows, Macintosh, Linux, NetWare, Solaris, WTS/Citrix, Virtual Environments*

## **More information:**

*www.sassafras.com  
603-643-3351*

## **Advanced Parameters**

- Any of the above restrictions...
- ...plus secondary data group restriction using Target Pane

## **Custom Data Views**

- Configure prior to running report
  - Date Range
  - Time Periods
  - Data Aggregation
  - Included Columns
- Customize columns after running report

## **Data Source**

- Less and less important as we optimize more and more...
- *Example:* K2 v7 optimized audit reports

## **KeyReporter**

- Special "Online reports"
  - *Example:* Division Activity
- Configure public access
- Schedule reports
- RSS feed
- KeyReporter window in KeyConfigure

## **ksODBC**

- Query KeyServer data directly from external tool
  - *Examples:* External reporting tool, Help Desk system, etc.

## **Example Reports of Interest**

- Audit (COMP x prog)
  - Includes only Programs that are in Products
  - Optional column for Serial Number
- Audit (SN x comp) - groups by serial number
  - "Count Details" reveals volume purchase vs. single purchase
- Audit Verbose (COMP x prog)
  - To see everything
- Audit Products (PROD x comp)
  - Useful with standard and custom Product definitions
  - "Guesses" Product. In some cases, shows two because there's a tie
- Computer reports for: Baseline / Delta / Hotfixes
- Histogram (PLCY), Weekly (PLCY), and Daily (PLCY)
  - Graphical usage reports
  - Weekly & Daily report average usage over time
- Config (PROD x plcy) & Config (PROD x prog)
- Logins (DIV x comp)
- Path Browser
- And more...

## **About K2 - KeyAuditor & KeyServer**

Winner of the 2010 CODiE Award for "Best Asset Management Solution," K2 KeyAuditor & KeyServer tracks and controls access to hardware and software assets with detailed license reconciliation, allocation, and usage reporting for any combination of physical, virtual, and thin client computers running the Windows, Macintosh, Linux, or Solaris operating systems.
