K2 is a cross platform SAM tool for managing software license entitlements throughout an enterprise. K2 tracks, controls, and reports software usage for license compliance and cost reduction. K2's comprehensive reports provide hardware profiles with complete software audits in detailed or summary formats.

Software usage histories and trends can be examined across an enterprise and its divisions. Customizable reports provide integrated views of software and hardware asset allocation, software usage patterns, and license compliance for Windows, Macintosh, Linux, and virtual computers. The Web Reports component supports RSS feeds to deliver html formatted reports that can be scheduled for periodic execution.

K2 - KeyAuditor & KeyServer Training at Goldsmiths, University of London Tuesday, 4 November 2008

New Cross, London: Sassafras Software is pleased to confirm the details of a Sassafras K2 User Group meeting and K2 training session at the Ian Gulland Lecture Theatre, Goldsmiths, University of London, New Cross, London on Tuesday afternoon, 4 November, 2008.

Prompt registration is encouraged but not required for attendance.

Sassafras User Group Meeting and K2 Software Training

The Ian Gulland Lecture Theatre
Goldsmiths, University of London
New Cross, London SE14 6NW
Tuesday, 4 November, 2008 – 13:30 - 17:00

Agenda:

- 13:30 - 14:15 "Entitlements-centric vs. Asset-centric Software Asset Management"
- 14:15 - 15:15 K2 – KeyServer Overview w/ Introduction to K2 Web Reports
 - Administrative console design and function
 - Using Divisions, Groups, Filters, and Rules
 - KeyReporter web reports, RSS, and custom web interfaces
- 15:15 - 15:30 Refreshment break
- 15:30 - 16:30 K2 Configuration:
 - Managing multiple versions of a program (K2 variant mask)
 - Software product management vs. software programs
 - Multiple license entitlements for the same program
 - Lab Management, scheduling, and license reservations
- 16:30 - 17:00 Q&A with follow-up examples

Additional/alternate topic proposals are encouraged.

The 13:30 session will be a white paper presentation that will include details of the ISO/IEC 19770-3 standard for software license entitlement tags. The 14:15 session will be a general walk-through of the K2 configuration console touching on each of the important functions with an introduction to KeyReporter scheduled & web reports. After a refreshment break, we will continue with detailed configuration and reporting topics and a Q&A session.

Registration

Advance registration is encouraged but not required. To register, complete the registration form at http://www.sassafras.com/pr/K2_UserGroupRegis.pdf.
