

PRODUCT SUMMARY

K2 - KeyAuditor & KeyServer is an integrated software asset management suite for automated IT asset auditing and software license management. K2 will show what's installed on your network and report details about its usage. It can also control access to licensed software and run detailed deployment and usage reports for your entire organization or for specific departments.

Sassafras Software has provided K2's license management technology since 1990 to some of the largest corporate, government, and educational enterprise networks throughout the world.

Enterprise-wide Audits

K2 integrates enterprise-wide software and essential hardware auditing with the award winning KeyServer's full featured license management services.

Reporting Functionality

An extensive collection of built-in and customizable reports provides an integrated view of software and hardware asset allocation, software usage patterns, and license compliance for all Windows, Macintosh, and Thin Client computers.

License Management

K2 manages all common software licenses, including unlimited site licenses, node-locked "per-CPU" licenses, concurrent-use, and custom licenses. You specify licensing policies and then track deployment and usage for each program or application suite.

Sassafras Software, Inc.

K2 - KeyAuditor & KeyServer is employed at thousands of organizations world-wide to successfully manage their IT requirements.

Publishers of K2 - KeyAuditor & KeyServer Integrated Software Auditing & Software License Management

Early Pioneer in Software Asset Management.

Based in Hanover, New Hampshire, Sassafras Software was an early pioneer in the development of software license compliance technology for desktop computers beginning in 1989. The company has been providing IT asset management solutions since their first public release of KeyServer in 1990. Sassafras enjoys broad support from software publishers, including many technical partners that rely exclusively on KeyServer technology. For nearly 20 years, Sassafras products have supported Software Asset Management (SAM) activities on some of the largest computer networks worldwide.

Standards Development & Thought Leadership.

As a leader in licensing technology, Sassafras Software is an active participant in several industry forums that promote the dialog between SAM administrators, compliance officers, software publishers, licensing service providers, and industry associations. Company leaders have presented software licensing issues for discussion at many industry and educational forums including SWAMI (Gartner Group), SIIA (SPA), IBSMA SAM Summit, IBSMA Software Licensing Practices Committee, IAITAM Annual Conference, NSBA, JPSA (Tokyo), MITI (Tokyo), and numerous others.
