K2 is an integrated software asset management suite for automated IT asset auditing and software license management. K2 will show what's installed on your network and report details about its usage. It can also control access to licensed software and run detailed deployment and usage reports for your entire organization, or for specific departments. Sassafras Software has provided K2's license management technology since 1990 to some of the largest corporate, government, and educational enterprise networks throughout the world.

K2 KeyAuditor & KeyServer
