

AllSight

The most comprehensive, lightweight, and reliable ITAM datasource for TeamDynamix IT Service Management

Enhance Productivity, Save Money & Gain Insight Into Your Entire IT estate

AllSight auto-populates comprehensive, up-to-date asset details **directly into TDX.**

- Computer Manufacturer & Model Name
- MAC address & Serial Number
- OS Version & Install Date
- Normalized Installed Software List
- Memory Speed & Capacity
- Storage Drive Size & Free Space
- Last User, Login Time, & IP address
- Processor & Video Card Details

Realtime Usage Tracking, One-Click Reporting & Lifecycle Management

AllSight primarily serves as an **Enterprise-level IT Asset Management solution.**

- Track & report on usage for all of your software
- Directly manage access to specific software titles
- Report on historical & realtime computer logins
- Import and manage hardware & software purchases
- Manage Computers, Printers, Monitors, Networking Equipment & more!

Lightweight client agent reports configuration details, software lists, realtime login and software usage data to AllSight.

AllSight normalizes software and hardware details, imports warranty dates from third-party sources, and syncs data to pre-existing assets in TDX or creates new ones as needed.

TeamDynamix receives up-to-date computer details from AllSight daily and sends lifecycle stage changes back to the AllSight database.

"We're consistently amazed by the power and simplicity of this product."
